Catalog Features

This catalog represents the maximum in flexibility for all facets of the exhaust industry. The first section of the catalog (pages 4-7) contains the list of muffler specifications by part number.

The second section (pages 8-12) contains the list of mufflers application by part number and the third section (pages 13-31) contains drawings detailed with the measures and specifications of mufflers.

Mufflers Manufacture

Siame has a semiautomatic and mechanical production system, elaborating mufflers to all type of vehicles and to requirement of the client. Working with high standards of quality we guaranteed our products.

The mufflers are elaborated with carefully selected materials. A silencer counts on 5 essential parts: outer body, inner body, tube of entrance, inner outlet pipe and firing chambers.

The outer body is made up with galvanized and aluminized steel laminate, obtaining with a this greater resistance to the corrosion and better presentation of ours mufflers.

The inner body is made with laminate steel cold rolled and to requirement of the client with galvanized steel laminate.

The firing chambers are elaborated with tubes and galvanized steel laminate. The entrance and exit make with aluminized steel tubes.

Siame also elaborates Resonators with the Glasspacker technology, we counted on the capacity to make of different thicknesses and several types from materials. The design glasspack provides the Maxim possible duration of the resonator, and requires the production of a separated sliding connector, a nucleus type blind with a splayed end, and a vaulted body to lodge the sliding connector in an end and the nucleus in the other.

Our mission is to satisfy the necessities with the clients, being guaranteed quality, service and the permanent competitive advantages that characterize to us.
